

NATIONAL NETWORKING: DRIVING CCS FORWARD

Organised by CO₂GeoNet and ENOS

THE EUROPEAN NETWORK OF EXCELLENCE ON THE GEOLOGICAL STORAGE OF CO₂

Aims of workshop

[CO₂GeoNet](#) and [ENOS](#) are organising a workshop dedicated to national CCS Clubs and Associations. This event offers an opportunity for national CCS clubs/associations to join together to drive CCUS forward more effectively by sharing lessons learned and communication strategies.

- **Establish an informal network of national CCS clubs and associations that will enable sharing of experience and future joint actions**
 - **Produce a joint press release from CO₂GeoNet and the national clubs/associations highlighting key issues (topics to be agreed at the workshop)**
 - **Discuss possibilities for organising joint events or cooperative actions to promote the uptake of CCS (eg talking with policy makers with support from CO₂GeoNet or other national clubs)**
-

Discussion - role for national actors in driving CCS forward

- Establish an **informal network** of national CCS clubs and associations that will **enable sharing of experience and future joint actions**
 - Produce a **joint press release** from CO₂GeoNet and the national clubs/associations highlighting key issues (topics to be agreed at the workshop)
 - Discuss **possibilities for organising joint events or cooperative actions** to promote the uptake of CCS (eg talking with policy makers with support from CO₂GeoNet or other national clubs)
-

**Thank
you for
your time**
